Summary

I am an Engineering Student. I started Graphics design out of Curiosity now it became my passion.

I love to work with pixels. I have 3+ years of Graphic Design skills. I am very proficient at Photoshop and Illustrator. My LinkedIn Profile also says that. This proficiency is built by the amount of time I invested in this sector.

I do Print-Design, Marketing & Advertising, Package & Product Design, Signage Design, Image Retouching, and also all kinds of Photo treatment.

I also have HTML, CSS knowledge with WordPress and JavaScript.

I believe these skills drove me to the right path that I have chosen.
